**Color name, number and dose-rate to mix with each 94 lb. sack of cement.**

*(Dry dose rates shown, liquid dose rates higher)*

**← Concrete Base Color**

The natural base color of concrete, finishing and curing method determines final color. This card simulates lab samples made with a light broom finish from Type II gray cement, sand and water at 0.56 water/cement ratio for a 4" slump (see uncolored reference at left). Different cements, sand, rock, mixing and job-site conditions and contractor technique can alter color from this card. Concrete is produced from natural materials. Surface variation common to uncolored concrete can impact colored concrete.

January 2014 Notice- All color swatches adjusted to new uncolored gray base cement shade. These swatches differ from previous color cards.
